DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-13, drawn to a method for treating viral infection.

Group II, claim(s) 14, drawn to a method of screening for leflunomide product having antiviral activity.

Group III, claim 15, drawn to use of leflunomide product in preparation of a medicament.

2. The inventions of Group I-III represent separate and distinct methods and method of preparation. They differ with respect to method steps, (e.g., administering antiviral effective luflunomide in Group I, screening luflunomide product in group II, and preparing medicament in Group III), subject matter involved, (patient and antiviral luflunomide in group I, Luflunomide and viral infected cell in group II) and final results. They have different issues regarding patentability and enablement and therefore lack the core technical feature.
